Valid Work Permit for NL

She/Her

1st April 2026

Dennis Van Hoof
DLL
Eindhoven, The Netherlands

Hi Dennis,
I am applying for the Global Data Quality Consultant role because it fits both my experience and the direction I want to build my career in the Netherlands. I bring 5+ years of experience in regulated financial environments across data management, data quality, governance, and reporting.

At American Express, I owned data-sharing and reporting products where data accuracy, consistency, traceability, and governance were critical to finance and regulatory reporting. I designed KPI-based data quality monitoring that improved establishment data reliability by 33%, worked across stakeholders in the US, Canada, and India, and supported profiling, validation, standardization, and multi-source integration in an Informatica-aligned environment. I also embedded governance controls into delivery, UAT, and releases to support trusted reporting outcomes.

I hold a valid Dutch work permit, I am currently learning Dutch at A2 level, and I am looking for a long-term opportunity in the Netherlands where I can contribute and grow. I would value the opportunity to bring my data quality and stakeholder management experience to DLL.

Sincerely,
Anshita Mathur
