PROFESSIONAL SUMMARY

Technical Product Manager with 5.5 years of experience in merchant acquiring operations and fintech product delivery across regulated banking and global financial-services environments. Track record owning end-to-end post-transaction journeys—reconciliation, settlement/reporting, temporary/permanent credits, refunds, and chargebacks—and delivering automation and self-service tooling to reduce manual effort and improve SLA performance. Skilled at defining product requirements, roadmaps, and MVP scope; partnering with engineers, data/ pricing analysts, finance and acquiring stakeholders; and translating technical detail into business outcomes to improve performance and scale operations.

PROFESSIONAL EXPERIENCE

Business Development Lead (Freelance), DeQollab, — 07/2025 – Present

- Structured stakeholder requirements into delivery plans and execution roadmaps, supporting clearer prioritization and alignment between business objectives and implementation expectations.

Relocation Break, — 01/2025 – 06/2025 | Netherlands

Senior Associate - Digital Product Management, American Express GCS, India — 09/2022 – 12/2024

- Led design and delivery of a one-stop financial technology operational platform used by 150 internal users to streamline issue resolution and payment data workflows for large corporate clients.
- Defined requirements, product vision, product roadmap, MVP scope, prioritization, testing/UAT, rollout, performance tracking, and leadership reporting for card-payment operations with ERP/client-system integrations and a partial shift from file-based transfer to API-enabled delivery by partnering with engineers and data analysts.
- Owned the end-to-end journey across client identification, SPOC mapping, settlement-reporting template validation, raw-versus-transformed data selection, file handling, and issue/exception tracking, reducing manual intervention and improving workflow consistency of data financial products.
- Integrated 5 key data sources supporting 22,000 client entities and ~70,000 daily data files, improving turnaround time and data quality by 33% while strengthening SLA performance.

Manager - Digital Journey Management, Axis Bank, India — 06/2019 – 09/2022

- Led RBI-mandated requirement gathering and end-to-end journey design for pan-bank dispute management and transaction servicing workflows across retail and corporate banking products, standardizing card and non-card operational journeys.
- Acted as SPOC for 7 strategic projects, including 3 directly related to disputes, merchant acquiring, transaction servicing, and card payment journeys, owned scope, prioritization, release sequencing, BRDs/FRDs, UAT sign-off, post-launch tracking, and leadership reporting.
- Designed and delivered unified CRM-led dispute and fraud journeys across ATM, POS, IMPS/UPI, merchant acquiring, and card-not-present/E-commerce dispute flows, incorporating product-specific timelines, reconciliation rules, and resolution paths.
- Integrated reconciliation workflows with NPCI-related dispute/escalation flows and vendor inputs, enabling temporary/permanent credit decisioning and automating exception handling, reducing manual dependency on email/Excel operations and improving key credit handling from ~3 hours to 5 minutes.

- Increased daily case-resolution throughput from ~60–80 to 200+ cases, improved dispute TAT by 30%, improved internal TAT by 20%, and supported pan-bank adoption across a 3,400-branch network while maintaining card-data masking and operational control compliance.
